Lower Cook Inlet Salmon Fishery News Release #15

SUBSISTENCE FISHERIES: Subsistence fishing periods in the Port Graham Subdistrict will continue on the current weekly schedule of 10:00 PM Thursday until 10:00 AM Wednesday until further notice.

As of Thursday, July 4 total of 9,156 sockeye salmon have been counted at the English Bay River weir. This is within the Sustainable Escapement Goal (SEG) range for this date of 4,249 - 9,561 fish. Typically, by July 4th, 71% of the final escapement has passed the weir. A table showing daily escapement numbers for 2013 is on page 2 of this announcement as well as daily escapement targets to achieve the Sustainable Escapement Goal (SEG).

Cook Inlet Aquaculture Association has indicated that they will need to harvest 4,398 English Bay Lake stock sockeye salmon to meet broodstock needs. To date 450 sockeye salmon of English Bay stock have been collected from Tutka Lagoon. The remaining 3,949 have been added to the final SEG range of 6,000 – 13,500 fish to achieve a final "inriver goal" of 9,948 – 17,448 sockeye salmon at the English Bay weir. These additional 3,949 broodstock fish from English Bay Lakes are shown on the table on page 2 of this announcement broken out into the daily amounts required to meet this goal.

Commercial periods may occur in the Port Graham Subdistrict when the combined minimum SEG and broodstock goal, (referred to as the "Inriver goal" on page 2) has been met or achievement can be projected.

Current weir counts are posted on the internet here:
